Every Possible Angle.

The Multi-Angle Stand, with an angle-precision of 1°, adjusts to virtually any angle. All it takes is the press of the button to adjust. What's more, the shelf design allows for viewing in both portrait and landscape positions.

Solid Aluminium.

Made of durable aluminium, the stand can handle loads of up to 5KG and take years of wear and tear. The elegant silver finish compliments most devices (especially for iPads), both in colour and style.

Designed around the details.

Well-placed rubber feet and pads protect your device from possible scratches. The pads are also detachable, allowing devices of various thickness to be held (0.55in / 14mm and under). The one-piece, foldable design makes for added convenience when carrying in a bag or otherwise on the go.
