

Runsense SF-810V

Advanced GPS sports monitor with built-in optical heart rate sensor to read heart rate directly from your wrist.

Featuring cutting-edge Epson sensing technology, the SF-810 combines our highly-accurate, energy-efficient GPS chip and our Smart Stride Sensor that learns your running technique with a state-of-the-art built-in optical heart rate sensor. Reading your heart rate from your wrist, you can free yourself from chest straps forever. And it has 20 hours of battery life in GPS and heart rate measuring mode.

Accuracy and comfort

Always keep track of your progress with this accurate and intelligent GPS sports monitor, featuring smart device compatibility. Sync the SF-810 with your phone to enable fast GPS positioning with the AGPS function. The integrated optical sensor accurately monitors heart rate from your wrist without the need for a separate chest strap. Its Smart Stride Sensor measures stride length and pitch and learns your individual technique, so if GPS signal is lost, the SF-810 will keep track of your distance and pace.

Helping you to train smarter

Runsense lets you track your progress against long-term targets designed to improve your performance. The free Runsense View portal and Run Connect app¹ help you customise your settings, and monitor, analyse, compare and even share your stats to maximise your potential. Connect to your smart device using Bluetooth Smart. Just tap to cycle through four customisable screens, with up to three measurements on each, chosen from a huge range of options.

Train your way, for longer

An impressive, combined GPS and heart rate-monitoring battery life of 20 hours - 2.5x longer than comparable competitor products² - means you can run for longer before recharging. Set customisable phases for interval training, variable target pacing and laps to suit your regime, or use the indoor mode. The SF-810 is water resistant up to 5ATM, and has a compact, lightweight design.

DATASHEET

KEY FEATURES

- **Accurately measure your performance**
Smart Stride, GPS and built-in heart rate sensors
- **Run for longer**
20 hours battery life - GPS and heart rate tracking
- **Analyse and evaluate**
With the Runsense View portal and free app¹
- **Customisable screens**
Tap to cycle through your data (4 screens with up to 3 measurements)
- **Dare yourself**
Set long term targets and short term goals

PRODUCT SPECIFICATIONS

FUNCTIONS

Lap	Manual Lap, Automatic Lap Distance, Automatic Lap Time, Programmable Lap
Interval	Time, Distance, Heartrate Zone, Programmable
Goal Function	Distance, Time
Light	Auto Light, Manual Light
Alarm	Distance Alarm, Pace Alarm, Heartrate Alarm
Time zone adjustment	Auto, Manual
Auto Pause	Yes

MEASUREMENTS

Number of measurement screens	up to 4 screens
Number of measurement items per screen	up to 3 measurements
Selectable measurements	Distance, Lap Distance, Guide Distance, Pace, Lap Pace, Average pace, Speed, Split Time, Lap Time, Time, Guide Time, Calories burned, Stride, Pitch, Altitude, Cumulative ascent in altitude, Cumulative descent in altitude, Gradient

GENERAL

Battery life GPS off	20 days
Battery Life GPS on	24 Hours
Battery life GPS & Heart Rate on	20 Hours
Battery life Heart Rate on	40 Hours
Tone	Yes
History capacity	400 laps
GPS Sensor	Yes
Smart Stride Sensor	Yes
LCD size	Diameter 28.2 mm
LCD pixels	128x128
LCD Reverse display mode	Yes
Runsense View web app	Yes
Runsense View smart phone app	Yes
Supported smart devices	For the latest compatibility please go to https://www.epson.co.uk/runsense
Measurement modes	Run, Walk, Bike
Width	max. 44.5 mm
Thickness	max. 14.12 mm
Weight	52 g
Water resistant	5 Bar
User interface	4 buttons + tap
Vibrate	Yes
Connection to Computer	USB
Connection to Smart phone	Bluetooth 4.0
Heart Rate Monitor	Optical
Supported web browser	Safari, Chrome, Firefox, Internet Explorer 9 or later
Computer Uploader	Yes

OTHER

Warranty	12 months Carry in
