

▶ 27MC67-B

27" class (27.0" diagonal)

**Features****IPS ON 4K & IPS SRGB**

- Color differences and color loss are minimized in the wide color gamut and color temperature that covers both the sRGB and CMYK color range.

NO STUTTERING

- FreeSync eliminates the occurrence of stuttering occurring due to the difference between a graphic card's frame rate and a monitor's refresh rate, creating fluid on-screen motion.

UL VALIDATED INPUT LAG

- DAS mode is classified in the top class of three lag classifications according to TFT Central, helping lag with graphic heavy games..

BLACK STABILIZER

- Black Stabilizer allows gamers to have better visibility, even in deep-dark scenes or too-light scenes.

HDMI 4K@60HZ

- 4K@60hz thru HDMI interface provides users can fully enjoy the next generation game without any display lag.

Specifications**Native Display Resolution** 3840 x 2160**High Brightness** 300 cd/m²**Contrast Ratio** 1,000: 1**5MS (G to G) Response Time,****Tilt, Pivot, Height Adjustable, Base Detachable Stand****Vesa™ Compliant Wall Mountable****3-Year Limited Warranty** Parts/Labor/Backlight

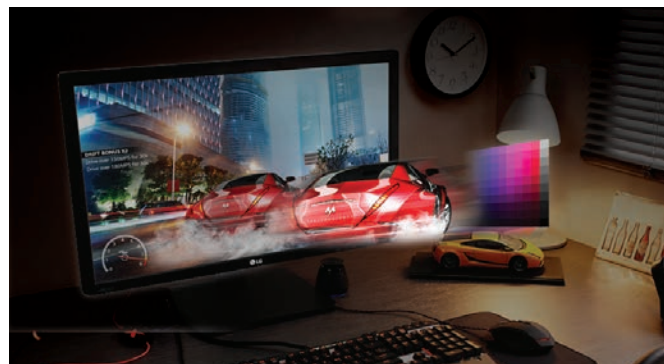

ULTRA HD 4K ON AN IPS DISPLAY

When IPS meets 4K, the result is even more amazing. The 27MC67's Ultra HD IPS Display offers much better color reproduction compared to TN panels, providing incredible viewing angles and great color consistency over the entire screen. With a 4K IPS monitor, gamers can enjoy seamless viewing for an ultimate immersive gaming experience. Furthermore, the 27MC67 in 3840x2160 Ultra HD resolution provides increased clarity, sharper texture, more details, more "real estate", and smoother images.

OVER 99% NO COLOR SHIFT OR DISTORTION

With the IPS sRGB over 99% & Factory Calibration, the 27MC67 provides sRGB with over 99% maximized color, based on an IPS panel that offers the most accurate color reproduction by far, the widest viewing angles, and the best-ever visual experience to the users.

NO STUTTERING FOR FLUID MOTION PLAY

With FreeSync technology of AMD, you can play without a frame loss. It also eliminates stuttering occurring due to the difference between a graphic card's frame rate and a monitor's refresh rate, which enables a smooth, fluid on-screen motion in games with the highest visual settings. Don't miss a second of the action with FreeSync, with no additional system upgrade

UL-VALIDATED LOW INPUT LAG

Input lag often determines the winner, especially in graphic-heavy games. So then, is it really true that TN's input lag speed is better than IPS? The answer is no. UL-approved 9.7ms or lower input lag on the 27MC67 (with DAS mode on) is classified in the top class of three lag classifications according to TFT Central. This means you can enjoy both UHD 4K resolution and fast speed with IPS's awesome picture quality!

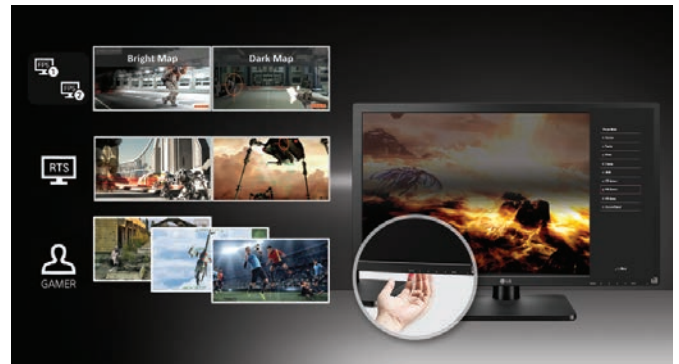

FREESYNC TECHNOLOGY

The 27MC67 offers the built-in FreeSync technology. FreeSync technology of AMD eliminates tearing that occurs, in games with the highest visual settings, due to the difference between a graphic card's frame rate and a monitor's refresh rate. Therefore, users who use the 27MC67 adapted to FreeSync technology with the AMD latest hardware can rest assured that they are enjoying the best experience possible.

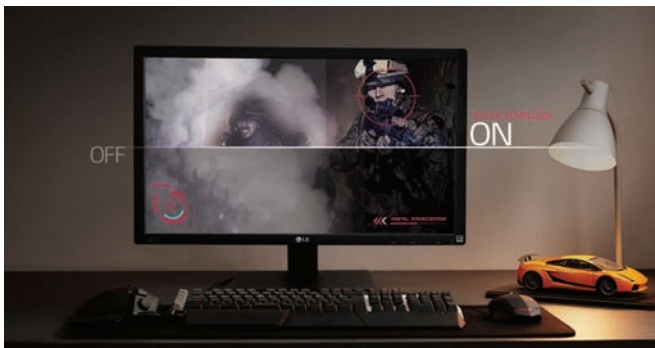

SETTING UP HOT KEYS

The hot key that toggles at the bottom of the monitor is designed to allow gamers to easily customize their gaming environment, ultimately increasing the possibility of winning.

BLACK STABILIZER

The Black Stabilizer allows gamers to have better visibility, even in deep-dark scenes or too-light scenes. It lets you have better strategy by enabling you to see if there is an enemy or object waiting to interrupt you in the darkest area. Plus, there is no more worry when facing a bright area, such as a flash bang attack; the Black Stabilizer effect minimizes visually-compromised areas on the screen during the flash bang.

HDMI 4K@60HZ

4K@60hz thru HDMI interface provides users can fully enjoy the next generation game without any display lag. Furthermore user can watch protected High-Definition contents (eg. Blu-ray player contents) through HDCP 2.2
