PHILIPS

Highlights

16 million colours

State-of-the-art LED's create millions of colours, including white light.

Adjust coloured and white light

Change colour, dim or adjust intensity of coloured light, dim white light. And pick the best combination of the two.

Adjust one light or all

When connected to other Philips LivingAmbiance products, you can change colour, dim or adjust intensity of coloured light luminaires and dim white light luminaires.

Automatic colour changing mode

To select automatic colour changing, sweep your finger around the colour wheel and press the 'I' button. Adjust the speed of colour changing by selecting a colour – from blue for just 5 seconds to purple for a full hour.

Dimming and colour intensity

Adjust the brightness to suit your mood. Add more white to the colour to get perfect subtle shades.

Easy to use remote control

Simply touch to change colour, dim or adjust colour intensity to get your favourite setting.

High-quality white light

High-quality halogens give warmer light when dimmed.

One remote for all lights

All of the LivingAmbiance products work together via the same intuitive remote control with which you can dim or change the colour of your lights – individually or together – in any combination you please. You can see which products work together by looking at the box or the product itself. If there is a SmartLink

logo, it means the product will work with other SmartLink products.

Recall your scene with a touch

Press one of the three scene buttons to recall your saved lighting settings.

Store 3 lighting scenes

Set this luminaire, or a combination of luminaires, to your preferred setting. Choose your favourite colour(s) (including dim and saturation level). Press and hold one of the scene buttons to store it.
